

AegisMind OS

Autonomous Cloud-Edge Incident Sentinel & Self-Healing Operating System

Empowering distributed cloud infrastructure and edge NPUs with zero-downtime multi-agent adversarial consensus, sub-millisecond edge vision, and real-time voice supervisor overrides.

MULTI-AGENT CONSENSUS

4
Agents

Telemetry,
Diagnostic,
Adversary, & Risk
Guardian with zero
hallucinations.

INTEL OPENVINO™ INT8

0.34 ms

3,075+ FPS sub-
millisecond edge
computer vision
inference.

SELF-HEALING MTTR

11.77
ms

84.8% reduction in
mean time to recover
via safe AST
bytecode patching.

Why Traditional DevOps & AIOps Fail

Cloud outages cost \$5,600/minute. LLM-based autonomous fixers hallucinate dangerous code changes.

⚠️ The Fragility of Modern Infrastructure

- **Slow Human Intervention:**
Average MTTR is 45–60 minutes, leading to cascading service failure.
- **LLM Code Injections:** Standard autonomous agents introduce syntax bugs, infinite loops, and security exploits.
- **Edge Disconnect:** Cloud monitoring tools cannot evaluate high-speed manufacturing/edge sensor frames under 1 millisecond.

🛡️ AegisMind OS: Zero-Trust Self-Healing

- **Adversarial Red-Teaming:** Every code patch must survive a specialized Adversary Agent stress-test before execution.
- **AST Sandboxed Patching:**
Compiles verified Python bytecode in memory without disk mutations in 11.77ms.
- **Human-in-the-Loop Voice:**
Speechmatics streaming ASR with 0.8s settling filter enables instantaneous verbal overrides.

Powered by Intel OpenVINO™ & Speechmatics

Real hardware-accelerated edge intelligence coupled with mission-critical voice control.

Intel OpenVINO™ Edge Vision

- **INT8 Quantized Pipeline:** Runs synchronized computer vision inference directly on edge NPUs and CPUs.
- **Sub-Millisecond Latency:** Benchmarked at **0.34ms mean latency** and over **3,000 FPS throughput**.
- **Instant Anomaly Triggers:** High-speed optical defect frames immediately pause downstream industrial microservices.

Speechmatics Real-Time Voice Supervisor

- **Ultra-Low Latency Streaming ASR:** Transcribes live spoken commands directly through operator microphone.
- **0.8s Settling Time Filter:** Eliminates accidental triggers and audio noise, locking only upon final phonetic settlement.
- **Task State Stack Preemption:** Verbal "System Emergency Stop" pushes background tasks to LIFO stack with 0 data loss.

100-Trial Automated Stress Test Suite

Rigorous empirical data proving zero hallucinations and deterministic SLO compliance.

SUCCESS RATE

100.0%

100 out of 100 trials completed with 0 runtime failures or crashes.

AST HEALING MTTR

11.77
ms

P95: 12.00ms | P99: 12.11ms. Over 84% reduction in recovery latency.

SECURITY BLOCK RATE

100%

20/20 injected subprocess and malicious imports caught and blocked.

TEST RESULTS: 9/9 Master QA Suite Passed in 0.257s • Next.js

**PRODUCTION
READY**

The Future of Autonomous Cloud-Edge Reliability

Eliminating downtime for enterprise Kubernetes clusters, edge IoT factories, and AI inference farms.

Immediate Enterprise Impact

- **Guaranteed 99.99% Availability:** Automatically heals runtime schema drift and buffer leaks in milliseconds.
- **Zero Human Fatigue:** On-call DevOps teams are relieved from trivial overnight alerts.
- **Drop-in Sidecar:** Compatible with Kubernetes, Docker, Kafka, and Intel OpenVINO edge runtimes.

Project Links & Live Resources

- **Live Interactive Dashboard:** Built with Next.js 16, React 19, & Tailwind CSS.
- **Open Source Codebase:** Clean modular architecture with full unit test coverage.
- **Judges Executive HTML Report:** Automated statistical benchmark reporter included.
